

Concrete Tactile Warning Panels

CASTinTACT®3

REPAIRaTACT Truncated Dome Replacement Tool

▶ PRODUCT DESCRIPTION

CASTinTACT®3 high strength cementitious concrete panels for detectable warning can be repaired fast and easily without replacing the entire panel. No need for extracting entire panels and ordering replacements due to a damaged dome. With the use of the REPAIRaTACT tool truncated domes are easy to core drill and replace.

▶ FEATURES & BENEFITS

The CASTinTACT®3 Advantage:

- Cementitious concrete panels used for both new construction and retrofit.
- Easy to cut and core, uses on radiuses, around bollards, stairs, and vault boxes.
- Textured concrete finish for wet and dry slip resistance.
- High compressive and flexural strength, durable, tough and crack resistant.
- Compatible with concrete base, similar thermal co-efficient of expansion as base.
- Resistant to severe exposure, wet freeze thaw damage from de-icing chemicals.
- Panels become an integral and permanent part of the walking surface.
- Unique patented early-fast set installation method that takes 10 minutes.
- CASTinTACT®3 panels do not float during installation. Panels stay where placed.
- Eliminates air pockets, voids, tripping hazards and ballast weight used during installation.
- Panels appearance improves with wear and age.
- Easy to clean, maintain and repair.

▶ APPLICATIONS

In The Event Of A Damaged Or Broken-off Dome:

1. Place drill bit on dome to be repaired.
2. Foot plate will line up on adjacent domes.
3. Core through concrete panel into substrate approximately 2" and remove core.
4. Grout replacement plug with polymer modified repair mortar; colored to match panel.
5. Foot plate can be used to help center and align.

▶ INSTALLATIONS

REPAIRaTACT Truncated Dome Replacement System For:

- Early Entry Fresh Set
- Retrofit / Block Out
- Thin Set

DAMAGED DOME

REPAIRED DOME

REMOVE 2" CORE

REPAIRED DOME!
