

POWER TOOLS

QUICK DISCONNECT REPAIR KIT

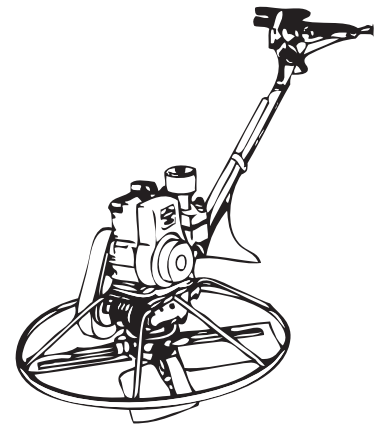

217A1 (**Z1**) threads on to any length of Oztec style flexible shaft.
 270MX1 (**Z2**) screws on to the motor housing.
 271GT1 (**Z3**) threads on to the motor armature (rotating part).
Comes as a three piece kit.

No.	Description
OZ QDKIT	Repair kit for quick Disconnect

POWER TROWELS

The walk behind Power Trowels are the lowest maintenance and longest lived trowels on the market. With an over-built gearbox, ground journal bearings, the strongest spider assembly available, teflon-lined bore inserts, and safety rings for operator protection, you will not find a more durable machine. Longer length handles produce greater leverage and fully enclosed safety switches add value to these precision-finishing machines. MBW's power trowel options include a quick tilting blade device, custom blades, adjustable guard rings for edging. **Gear Box:** Component by component, the gear box outperforms and out lasts the competition. From the single piece machined worm shaft to the over built spider assembly, the trowels are driven by the strongest gear box in the industry. **Constant Force Pitch:** The constant force pitch allows for quick blade adjustment and positive engagement. The constant force spring provides the smoothest and fastest blade adjustment. **Edger:** Adjustable guard ring offers operator the ability to finish within 1/8" of walls, eliminating costly hours of handwork.

No.	Size	Motor	Description	Wt (lbs)
MBW F365HE	36"	5.5 HP Honda	Standard / Edger	163.00
MBW F468HBE	46"	8 HP Honda	Blitz Pitch / Edger	224.00

PLATE COMPACTOR

This plate compactor delivers superior performance on all surfaces. Exclusive eccentric housing is an integral part of the base plate, so vibration is more effectively transferred to the ground. The base plate design includes an extra large oil reservoir that dissipates the internal heat to the entire plate surface. The reservoir cools the oil inside and preheats the base plate for more efficient performance on asphalt. Self-cleaning base plate eliminates rock and dirt buildup. The eccentric is slightly forward of the engine, delivering increased climbability. Synchronized drive system outsmarts the toughest conditions. Patented offset eccentric sheave eliminates belt stress extends belt life. Space-age on-piece Kevlar belt reduces wear, increases life. Single-piece, heavy duty centrifugal clutch delivers greater reliability.

No.	Motor	Plate Size	Compaction Force	VPM	Wt (lbs)
SN SFP22004	4 HP Honda	13" x 21"	2,200 lbs.	6100	140.00
SN SFP30005	5.5 HP Honda	20" x 24"	3,000 lbs.	6000	205.00
