

# TAMPERS

## CONCRETE

**Round Hole** - These concrete tampers are rugged and durable, built to handle any job. Tamping with this tool pushes large aggregate down, and cream to the top for easy finishing.

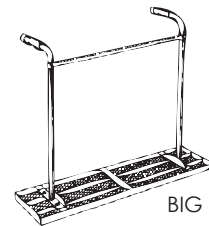

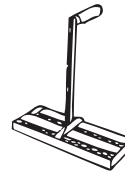

| No.            | Size     | Wt (lbs) |
|----------------|----------|----------|
| <b>Walking</b> |          |          |
| TTA 48R        | 48" x 8" | 16.00    |
| TTA 36R        | 36" x 8" | 19.00    |

ROUND HOLE

**Big Diamond** - Many concrete finishers prefer this style because it diverts the concrete splash away from the legs of the finisher.

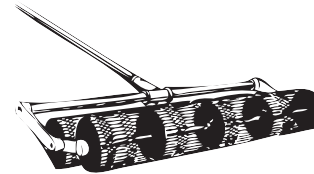

| No.            | Size     | Wt (lbs) |
|----------------|----------|----------|
| <b>Walking</b> |          |          |
| TTA 48         | 48" x 8" | 18.00    |
| TTA 36         | 36" x 8" | 16.00    |

BIG DIAMOND

**Rollerbug** - One person handles the rollerbug with ease, and it tamps twice as fast as a regular tamper. Ideal for all finishes: float, broom, trowel, or as a key for two course work. The rollers are the only moving parts, making maintenance simple. Levels the slab. Creates non-skid surface when rolled over the final finish.

| No.            | Size                          | Wt (lbs) |
|----------------|-------------------------------|----------|
| <b>Walking</b> |                               |          |
| TTA R36        | 36" Wide with 5" Dia. Rollers | 26.00    |

## DIRT

Excellent way to tamp dirt surfaces. Heavy duty head with ribbed design and steel handle.

| No.     | Size      | Wt (lbs) |
|---------|-----------|----------|
| TTA D8  | 8" x 8"   | 12.00    |
| TTA D10 | 10" x 10" | 18.00    |
