

# TROWEL BLADES

## POWER TROWEL REPLACEMENT BLADES

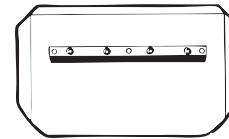

Made of high quality heavy duty steel to exacting specifications. High performance in Combination, Finish and Float for 36" or 46" machines of later models. Fit for machines such as Bartell, MBW Stone, Stow, Superior, Whiteman and others. Trowel blades of the same high quality can be ordered for the older machines in many different bolt patterns. Each blade is designed for long life and superior performance.

## COMBINATION

Made from heavy gauge steel, combination blades are designed for those who wish to use one blade for both float and finish operations. Set in the flat position, the blade is used for floating while a slight pitch produces a smooth or a polished finish.

No.	Size	Trowel	Wt (lbs)
TTW C14	14" x 8"	36"	4.00
TTW C18	18" x 8"	48"	5.00
TTW C18HD	18" x 8" Heavy Duty	48"	5.00

## FINISH

Finish blades are designed to produce a smooth or polished finish to concrete surfaces. After a slab has set up, trowel pitch is increased, with the greater blade angle producing a smooth or a polished finish.

No.	Size	Trowel	Wt (lbs)
TTW F14	14" x 6"	36"	3.00
TTW F18	18" x 6"	48"	4.00
TTW F18HD	18" x 6" Heavy Duty	48"	4.00
