

# SAFETY DATA SHEET

#### 1. Identification

| Product identifier            | WATERSTOP-RX® 101T  |
|-------------------------------|---|
| Other means of identification | Not available.  |
| Recommended use               | Not available.  |
| Recommended restrictions      | Workers (and your customers or users in the case of resale) should be informed of the potential presence of respirable dust and respirable crystalline silica as well as their potential hazards. Appropriate training in the proper use and handling of this material should be provided as required |

Manufacturer/Importer/Supplier/Distributor information

| Manufacturer           |                               |                        |

under applicable regulations.

# 2. Hazard(s) identification

| (-)  |  |
|--|--|
| Physical hazards                             | Not classified.  |
| Health hazards                               | Not classified.  |
| Environmental hazards                        | Not classified.  |
| OSHA defined hazards                         | Not classified.  |
| Label elements                               |  |
| Hazard symbol                                | None.  |
| Signal word                                  | None.  |
| Hazard statement                             | The mixture does not meet the criteria for classification.                     |
| Prevention                                   | Observe good industrial hygiene practices.                                     |
| Response                                     | If exposed or concerned: Get medical advice/attention.                         |
| Storage                                      | Store away from incompatible materials.  |
| Disposal                                     | Dispose of waste and residues in accordance with local authority requirements. |
| Hazard(s) not otherwise<br>classified (HNOC) | None known.  |
| Supplemental information                     | Not applicable.  |
|  |  |

#### 3. Composition/information on ingredients

**Mixtures** 

| Chemical name                   | Common name and synonyms  | CAS number                  | %        |
|---------------------------------|---|-----------------------------|----------|
| CARBON BLACK                    |   | 1333-86-4                   | < 1      |
| Other components below re       | portable levels   |                             | 90 - 100 |
| Impurities                      |   |                             |          |
| Chemical name                   |   | CAS number                  | %        |
| QUARTZ                          |   | 14808-60-7                  |          |
| *Designates that a specific che | mical identity and/or percentage of composition has b   | een withheld as a trade s   | secret.  |
| Composition comments            | Occupational Exposure Limits for impurities are occurring crystalline silica (not listed in Annex I o 6%. |                             | 5        |
| 4. First-aid measures           |   |                             |          |
| Inhalation                      | Not likely, due to the form of the product. Get me  | edical attention, if needed | I.       |
| Skin contact                    | No specific first aid measures noted. Wash with   | water and soap as a prec    | caution. |

Material name: WATERSTOP-RX® 101T

| Eye contact  | Flush eyes immediately with large amounts of water. If irritation persists get medical attention.  |
|--|--|
| Ingestion  | Not likely, due to the form of the product. If ingestion of a large amount does occur, seek medical attention.   |
| Most important<br>symptoms/effects, acute and<br>delayed                     | Direct contact with eyes may cause temporary irritation.   |
| Indication of immediate<br>medical attention and special<br>treatment needed | Provide general supportive measures and treat symptomatically.   |
| General information  | Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.   |
| 5. Fire-fighting measures  |  |
| Suitable extinguishing media   | Water fog. Foam. Dry chemical powder. Dry chemical, CO2, water spray or regular foam. Carbon dioxide (CO2). Use any media suitable for the surrounding fires.                          |
| Unsuitable extinguishing media   | None known.  |
| Specific hazards arising from the chemical                                   | During fire, gases hazardous to health may be formed.  |
| Special protective equipment<br>and precautions for firefighters             | In the event of fire, wear self-contained breathing apparatus.   |
| Fire-fighting<br>equipment/instructions                                      | In the event of fire, cool tanks with water spray.   |
| Specific methods   | Cool containers exposed to flames with water until well after the fire is out. In the event of fire and/or explosion do not breathe fumes.   |
| General fire hazards   | Not a fire hazard. No unusual fire or explosion hazards noted.   |
| 6. Accidental release meas   | sures  |
| Personal precautions,  | Keep unnecessary personnel away. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. For personal protection, see section 8 of the SDS |

| Personal precautions,<br>protective equipment and<br>emergency procedures | Keep unnecessary personnel away. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. For personal protection, see section 8 of the SDS. |
|---|---|
| Methods and materials for<br>containment and cleaning up                  | For waste disposal, see section 13 of the SDS.  |
| Environmental precautions   | None known.   |

### 7. Handling and storage

Precautions for safe handlingAvoid prolonged exposure. In case of insufficient ventilation, wear suitable respiratory equipment.Conditions for safe storage,<br/>including any incompatibilitiesNo special restrictions on storage with other products. Store in original tightly closed container.<br/>Store away from incompatible materials (see Section 10 of the SDS). Keep in a cool,<br/>well-ventilated place.

# 8. Exposure controls/personal protection

#### **Occupational exposure limits**

| Components   | Туре               | Value            |   |

#### 10. Stability and reactivity

| Reactivity                            | The product is stable and non-reactive under normal conditions of use, storage and transport. |
|---------------------------------------|---|
| Chemical stability                    | Stable at normal conditions.  |
| Possibility of hazardous<br>reactions | Will not occur.   |
| Conditions to avoid                   | Contact with incompatible materials.  |
| Incompatible materials                | None known.   |
| Hazardous decomposition<br>products   | At thermal decomposition temperatures, carbon monoxide and carbon dioxide.                    |

## 11. Toxicological information

#### Information on likely routes of exposure

| Ingestion                                      | Expected to be a low ingestion hazard.                   |
|--|--|
| Inhalation                                     | Prolonged inhalation may be harmful.                     |
| Skin contact                                   | Not available.   |
| Eye contact                                    | Direct contact with eyes may cause temporary irritation. |
| Symptoms related to the physical, chemical and | Direct contact with eyes may cause temporary irritation. |

| LD50                     | Rat     | 500 mg/kg    |  |

\* Estimates for product may be based on additional component data not shown.

| Skin corrosion/irritation                             | Prolonged skin contact may cause temporary irritation  |  |
|---|--|--|
| Serious eye damage/eye                                | Prolonged skin contact may cause temporary irritation.<br>Mild irritant to eyes (according to the modified Kay & Calandra criteria) Mild irritant to eyes  |  |
| irritation  | (according to the modified Kay & Calandra criteria)  |  |
| Respiratory or skin sensitization                     |  |  |
| Respiratory sensitization                             | Not available.   |  |
| Skin sensitization                                    | According to the classification criteria of the European Union, the product is not considered as being a skin irritant.  |  |
| Germ cell mutagenicity                                | No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.   |  |
| Carcinogenicity                                       | In June 2003, SCOEL (the EU Scientific Committee on Occupational Exposure Limits) concluded that the main effect in humans of the inhalation of respirable crystalline silica dust is silicosis. "There is sufficient information to conclude that the relative risk of lung cancer is increased in persons with silicosis (and, apparently, not in employees without silicosis exposed to silica dust in quarries and in the ceramic industry). Therefore, preventing the onset of silicosis will also reduce the cancer risk" (SCOEL SUM Doc 94-final, June 2003) According to the current state of the art, worker protection against silicosis can be consistently assured by respecting the existing regulatory occupational exposure limits. Occupational exposure to respirable dust and respirable crystalline silica should be monitored and controlled. Risk of cancer cannot be excluded with prolonged exposure. |  |

| Reproductive toxicity                                 | This product is not expected to cause reproductive or developmental effects.   |  |
| Specific target organ toxicity -                      | Not classified.  |  |
| single exposure                                       |  |  |
| Specific target organ toxicity -<br>repeated exposure | Not classified.  |  |
| Aspiration hazard                                     | Not available.   |  |
| Chronic effects                                       | In 1997, IARC (the International Agency for Research on Cancer) concluded that crystalline silica inhaled from occupational sources can cause lung cancer in humans. However in making the overall evaluation, IARC noted that "carcinogenicity was not detected in all industrial circumstances studied. Carcinogenicity may be dependent on inherent characteristics of the crystalline silica or on external factors affecting its biological activity or distribution of its polymorphs." (IARC Monographs on the evaluation of the carcinogenic risks of chemicals to humans, Silica, silicates dust and organic fibres, 1997, Vol. 68, IARC, Lyon, France.)  |  |
|   | In June 2003, SCOEL (the EU Scientific Committee on Occupational Exposure Limits) concluded that the main effect in humans of the inhalation of respirable crystalline silica dust is silicosis. "There is sufficient information to conclude that the relative risk of lung cancer is increased in persons with silicosis (and, apparently, not in employees without silicosis exposed to silica dust in quarries and in the ceramic industry). Therefore, preventing the onset of silicosis will also reduce the cancer risk" (SCOEL SUM Doc 94-final, June 2003)  |  |
|   | According to the current state of the art, worker protection against silicosis can be consistently assured by respecting the existing regulatory occupational exposure limits. Prolonged inhalation may be harmful. Prolonged exposure may cause chronic effects. Some of the components of this product are hazardous in the respirable form. However, because of the physical nature of this product, dust generation is not expected.   |  |
|   | Occupational exposure to nuisance dust (total and respirable) and respirable crystalline silica should be monitored and controlled.  |  |
| 12. Ecological information                            | 1  |  |
| Ecotoxicity   | No data available for this product. This material is not expected to be harmful to aquatic life.   |  |
| Persistence and degradability                         | No data is available on the degradability of this product.   |  |
| Bioaccumulative potential                             | No data available.   |  |
| Mobility in soil                                      | No data available.   |  |
| Other adverse effects                                 | No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.  |  |
| 13. Disposal consideration                            | ns   |  |
| Disposal instructions                                 | Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Material should be recycled if possible.  |  |
| Local disposal regulations                            | Dispose in accordance with all applicable regulations.   |  |
| -   |  |  |

| Hazardous waste code   | The waste code should be assigned in discussion between the user, the producer and the waste disposal company.   |
|--|--|
| Waste from residues / unused<br>products                                       | Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions). |
| Contaminated packaging   | Empty containers should be taken to an approved waste handling site for recycling or disposal.<br>Since emptied containers may retain product residue, follow label warnings even after container is emptied.    |
